

Cushing's Disease Diagnostic Study

**The Primary Purpose of this Study is
To Confirm Recurrent or Persistent Cushing's Disease**

Potential subjects are 18 years of age or older and have:

- A previous diagnosis of Cushing's disease (pituitary Cushing's)
- A suspected recurrence/persistence of previously diagnosed Cushing's
- Previous pituitary surgery and/or radiation for Cushing's disease
- Clinical signs and symptoms of Cushing's syndrome

This is a diagnostic study only. No test drug will be administered.
Diagnostic testing is provided at no cost; medical insurance is not required.
